SUMMARY

Full Stack Developer with 4 years and 4 months of hands-on experience building real-world applications in e-commerce, education, and enterprise domains. I enjoy creating clean, user-friendly frontends and strong, reliable backend systems. I focus on smooth user experience, performance improvements, and practical problem-solving. Always interested in learning new technologies and building solutions that make a real impact.

WORK EXPERIENCE

EDXAR – NEET Education Platform (Role-Based System) Vreon Tech India Pvt Ltd (Aug 2024 - Present)

- Developed role-based modules for students, parents, teachers, and school management, ensuring secure and structured access.
- Built interactive learning modules with MCQ practice, 3D model explanations, and study resources like PDFs, videos, and audio lessons for easy and effective learning.
- Implemented backend services using C# (ASP.NET) and MySQL for smooth student flow management, performance tracking, and report generation.
- Integrated Zoho Payment Gateway for subscription plans, recurring payments, and access management.

Technologies: Angular, C#, MySQL, Zoho Payment Gateway

JewelAR – E-Commerce Website with AR Try-On

- Designed and developed a modern e-commerce web application with AR Try-On features for jewelry visualization.
- Built dynamic and responsive UI screens using Angular, ensuring smooth product browsing and user interaction.
- Developed secure backend APIs in C# (ASP.NET) with MongoDB for product, user, order, and AR data handling.
- Integrated Razorpay payment gateway with complete checkout flow, transaction validation, and order capture.

Technologies: Angular, TypeScript, HTML/CSS, C#, ASP.NET, MongoDB, Razorpay

RFID Library Management System – Technify Bloom Technologies Pvt. Ltd (2022 - 2024)

- Built an automated RFID-based library system for book tracking, inventory management, and audit logs.
- Developed self-check-in and self-check-out kiosk modules using Angular and RFID scanners.
- Built backend services in Spring Boot with MySQL for seamless book status updates and transaction logs.
- Enabled real-time RFID data sync, reducing manual workload and improving library operations.

Technologies: Angular, Java, Spring Boot, MySQL, RFID Integration

OPAC – Online Public Access Catalog System

- Developed a searchable catalog for books, journals, and academic resources used by students and staff.
- Built an intuitive UI in Angular for quick navigation, filtering, and resource discovery.
- Implemented REST API architecture in Spring Boot connecting catalog data with frontend modules.
- Optimized database queries in MySQL to improve search performance and reduce page load time.

Technologies: Angular, Java, Spring Boot, REST APIs, MySQL

GST Credit Application – Financial Platform

- Built loan-access workflows allowing users to apply for GST-based credit with customizable limits.
- Created responsive user dashboards using Angular with real-time credit info and status tracking.
- Developed backend workflows in Spring Boot for loan validation, approval, and financial history management.
- Integrated Worldline Payment Gateway for secure transactions and automated verification.

Technologies: Angular, Java, Spring Boot, MySQL, Worldline Payment Gateway

SKILLS

Technical Skills:

- ❖ Java
- ❖ Spring Boot
- ❖ Mysql
- ❖ MongoDB
- ❖ Html
- ❖ Css
- ❖ Angular
- ❖ C#
- ❖ ASP.NET

Language Ability:

- To Speak : Tamil,English
 - To Read & Write : Tamil,English
-

EDUCATION

- Completed by B.sc(Computer Science) with 70% from Chikkanna Government College of Arts and Science, Tiruppur.
 - Completed HSC with 65% from GOVT Higher Secondary School.
 - Completed SSLC with 75% from GOVT Higher Secondary School .
-
